

# Lucas Miller

## Letter of Recommendation 1

---

To Whom It May Concern,

I am writing to highly recommend Lucas Miller for your esteemed academic program. As his AP Computer Science teacher for the past two years, I have witnessed Lucas grow in both skill and intellectual maturity, consistently impressing me with his dedication, creativity, and knack for problem-solving.

Lucas is a logical thinker who thrives on challenges. His passion for technology is evident not just in the classroom but also through his contributions to the broader community. As the Lead Organizer for the Coding Symposium, Lucas demonstrated tremendous leadership qualities. He coordinated with various stakeholders and executed a complex event that benefited not only our school but also the larger tech community. His ability to lead and inspire his peers is genuinely remarkable.

Lucas is also an extraordinary coder. His coding projects display an innovative flair that most students of his age lack. He has built a machine learning model to predict chess outcomes, a project that combined his love for technology and chess in a truly ingenious manner. His GitHub account is a testament to his coding prowess and ingenuity.

But Lucas isn't just book smart; he's also a person of strong character. He is open-minded and values diversity in thought, often leading healthy debates in class that encourage his classmates to think critically.

In summary, Lucas embodies the best qualities of a leader, scholar, and community member. His commitment to personal growth and societal betterment make him an ideal candidate for any prestigious program. I wholeheartedly recommend him without reservation.

Sincerely,  
Lucas' AP Computer Science Teacher
